INSTRUMENTS

SOFTWARE

CONSUMABLES

As an ion channel researcher, you can expect more from your discovery efforts with Molecular Devices electrophysiology solutions. We've combined the market-leading products from Axon Instruments® with our IonWorks® product line to give you the widest array of electrophysiology instruments and software available.

Whether you're looking for a comprehensive conventional patch clamp system or an automated high-throughput screening tool, we have a solution to help you discover more.

- ➔ IonWorks Quattro™: Proprietary Population Patch Clamp™ technology provides superior data consistency and nearly 100% success rates; collects 2000+ data points per day at lowest cost
- ➔ PatchXpress® 7000A: Versatile, automated system records conventional patch-clamp quality data from up to 16 cells simultaneously
- ➔ Axon CNS amplifiers and software: Industry-standard, ultra-low-noise amplifiers and pCLAMP® data acquisition and analysis software

Expect more. We'll do our very best to exceed your expectations.
